SOLID RESULTS

BNP Paribas' diversified and integrated model and its ability to accompany clients and the economy in a comprehensive way by mobilising its teams, resources and capabilities, continued to drive growth in activity and results in the third guarter 2023.

Driven by the strength of the diversified model, the Group's performance is solid, as reflected in its distributable income¹. On this basis¹, revenues rose by 4.3% and operating expenses by 3.4% compared to the third quarter 2022. Operating expenses were well contained, and the Group achieved a positive jaws effect. Thanks to a long-term approach and prudent and proactive risk management, cost of risk remained low (at 33 basis points of customer loans outstanding) and below 40 basis points, which is the guidance of the GTS 2025 plan.

Distributable net income¹ came to 8,810 million euros in the first nine months of 2023, up sharply by 9.5% compared to the result of the first nine months of 2022¹. The Group's organic growth offset the effects of the sale of Bank of the West. Distributable net income thus reflects the Group's intrinsic performance after the impact of the sale of Bank of the West and after the contribution to the ramping up of the Single Resolution Fund.

The Group has stepped up its policy of engaging with society. It deploys a comprehensive approach and, alongside its clients, is committed to transitioning towards a sustainable and low-carbon economy with clear ambitions and objectives contributing to the advent of a carbon-neutral economy by 2050. In particular, the Group released its Climate Report in May 2023 detailing measures it has taken to align its loan portfolios with the International Energy Agency's "Net Zero by 2050" scenario for the sectors with the highest emissions², in accordance with its goal of achieving carbon neutrality

¹ Result serving as a basis for calculating the ordinary distribution in 2023 and reflecting the Group's intrinsic performance after the impact of the Bank of the West sale and after its contribution to the Single Resolution Fund (SRF) as described in slide 8 and 44 of the 3Q23 results presentation. Changes have been calculated on this basis. 9M23 distributable net income adjusted in accordance with the announcements made in February 2023, i.e., reported net income excluding exceptional items (in 9M23, capital gain on the Bank of the West sale (+€2,947m) and the negative impact of the adjustment in hedges related to changes in TLTRO terms and conditions decided by the ECB in 4Q22 (-€891m)) and complementary adjustments (+€916m in net income, Group share, of which +€802m in anticipation of the end of the ramping up of the SRF).

CORPORATE CENTRE

IFRS 17 "Insurance contracts" has replaced IFRS 4 "Insurance contracts" since 1 January 2023. IFRS 17 entered into force together with the implementation of IFRS 9 for insurance activities.

The main effects are as follows:

- Operating expenses deemed "attributable to insurance activities" are recognised in deduction
 of revenues and no longer booked in operating expenses. These accounting entries apply
 only to Insurance and to Group entities (other than in the Insurance business line) that
 distribute insurance contracts (i.e., internal distributors) and have no impact on gross
 operating income. The impact of these entries for internal distributors is presented in
 Corporate Centre, in order not to disrupt the readability of their financial performance.
- The impact of the volatility generated by the fair value accounting of certain assets through profit and loss (IFRS 9) is presented in Corporate Centre and therefore has no impact on Insurance revenues.

As of 01.01.23, Corporate Centre thus includes restatements which, for a better readability, will be reported separately each quarter.

<u>In the third quarter 2023</u>, revenues on restatements related to insurance activities in Corporate Centre amounted to -239 million euros (-280 million euros in the third quarter 2022). This included -236 million euros from the impact of restating "attributable" operating expenses of internal distributors (-249 million euros in the third quarter 2022) and -2 million euros from the impact of volatility at Insurance generated by the fair value accounting of assets through profit and loss (IFRS 9) (-31 million euros in the third quarter 2022).

Operating expenses from restatements related to insurance activities in Corporate Centre came to -757 million euros in the first half 2023 (-759 million euros in the first nine months of 2022). Pre-tax income in Corporate Centre from restatements related to insurance activities thus amounted to -51 million euros (-297 million euros in the first nine months of 2022).

<u>In the third quarter 2023</u>, Corporate Centre's revenues, excluding restatements related to insurance activities came to -65 million euros (-43 million euros in the third quarter 2022). They included the

Methodology - Comparative analysis at constant scope and exchange rates

The method used to determine the effect of changes in scope of consolidation depends on the type of transaction (acquisition, sale, etc.). The underlying purpose of the calculation is to facilitate period-on-period comparisons.

In case of acquired or created entity, the results of the new entity are eliminated from the constant scope results of current-year periods corresponding to the periods when the entity was not owned in the prior-year.

In case of divested entities, the entity's results are excluded symmetrically for the prior year for quarters when the entity was not owned. In case of change of consolidation method, the policy is to use the lowest consolidation percentage over the two years (current and prior) for results of quarters adjusted on a like-for-like basis.

Comparative analysis at constant exchange rates are prepared by restating results for the prior-year quarter (reference quarter) at the current quarter exchange rate (analysed quarter). All of these calculations are performed by reference to the entity's reporting currency.
